

It's Good to Be King

Owner, Blake Callahan

Although he hasn't yet reached age 30, St. Simons Island native Blake Callahan has a wealth of experience in the hardscape industry. Over the past decade, he has been steadily making a name for himself and his businesses as one of the area's preeminent design-build contractors. *Elegant Island Living* recently sat down with the young entrepreneur dubbed by articles in Atlanta-based media as "The King of Hardscapes and Outdoor Living" to learn more about Seaside Pavers & Tile and the other businesses he runs under the umbrella of BC Companies.

Seaside Pavers & Tile is a family-owned, Golden Isles based company that specializes in hardscape/landscape design and installation and hardscape restoration/maintenance for both commercial and

residential clients. They also offer installation of patios/flagstone patios, brick, masonry, tabby and concrete work, outdoor lighting, water features, retaining walls, deck and screened-in porch construction, irrigation systems, and resolution of drainage problems. Whether you simply want to add elements to your existing hardscape/landscape or require a complete design, Seaside's experts can design and maintain a hardscape or landscape that suits your specific style and taste. Blake explains, "This company was built on trust and value with our clients. We always strive to have a true working partnership with property owners. We want satisfied clients and we are fully committed to their property improvement and maintenance needs."

In response to clients' needs, Blake has expanded the business to include Seaside

Pools & Spa to encompass pool and poolscapes design and installation, pool and spa renovation and resurfacing. Seaside Pavers & Tile also designs and installs custom kitchens and baths, installs outdoor lighting and secure fencing options. Their service area ranges from Charleston to Jacksonville, including Atlanta, Savannah, St. Simons Island, Sea Island. Most importantly, Blake and his crews perform ALL work needed for all aspects of your job in-house. That means you don't need to hire additional contractors and worry about scheduling and signoffs to continue work; Blake will be there to handle your entire project from planning through completion. Hardworking is an understatement! BC Companies is truly a one-stop shop for a comprehensive array of professional outdoor services.

Not only is the extensive selection of services offered by Blake and his crews impressive, so is the work they do. With 5-star ratings across all rating platforms, Seaside Pavers & Tile is known for prompt and reliable service and providing high quality workmanship quickly and efficiently. If you're looking to install a new pool for summertime fun, Seaside Pools & Spas can have you swimming in less than three weeks! That means if you call now, you can plan a Memorial Day Weekend pool party!

At a time when we're seeing supply chain issues, delays in shipping, and shortage of manpower, many construction and renovations jobs are facing hold-ups. Blake suggests that one of the best ways to add value to your home quickly is with outdoor

living spaces. From upgrading with pavers or flatscaping to installing a new pool or spa to creating an outdoor kitchen or living area with firepit, you can expand your home in a way that takes advantage of our beautiful coastal environment. As Blake says, "This is why people move here! You can be outside 10 out of 12 months, so we can design areas to take advantage of that. It increases the appeal and value of your home immediately." Blake has the advantage of buying pavers and hardscape materials in bulk, so you won't experience the same availability and delay concerns you'd have with lumber products and other construction materials. Even outdoor lighting projects can add appeal by showcasing our beautiful oak canopy or impeccable landscaping. Installing lighting also provides evening ambiance and security around the yard. Why wait to make your home as attractive as it can be? Blake is ready to help you turn your custom home dreams into reality and always provides free quotes for services.

Client testimonials speak loudest about the work performed by Seaside and the professionalism of Blake and his team. Emma Humphries gave this rave review: "I give Seaside Pavers & Tile my highest possible recommendation. We were hosting my grandparents' 70th wedding anniversary (that's right – 70 years!) and needed our pool deck complete. Even after two major setbacks beyond Seaside's control (delivery delay and Hurricane Dorian), the team was able to get it done in time. I've never seen an owner and his team hustle like that! It's also worth noting

that the owner is very responsive and always shows up when he says he will. Oh, and the pool deck ... it's beautiful!"

Suzanne Price Pittman shared her experience: "I had a very small patio that was very unappealing. I met with Blake and was immediately impressed with both his creativity and professionalism. He took a small space at the Reserve at Demere and transformed it into a work of art. I would like to be able to say that I was involved in the design but was not at all. Blake's creativity and attention to detail created an amazing space. And all this was done in a day! I enthusiastically recommend Seaside Pavers and Tile for any needs!"

And, as they say, a picture is worth a thousand words, so visit bc-companies.com to look at their project gallery and see the photos of work they have completed, in addition to what you see on these pages. When you're ready to tackle your project or create the outdoor living space of your dreams, call "the King" at 912.409.7684. You'll be the one feeling like royalty when the job is complete!
